

# WIFI-Stick

> Wireless communication module

- Minimum 10 days of secure data storage function
- Supports automatic data upload function once communication reestablished
- Plug and play design, easy to install
- Automatic time synchronisation
- Supports all mainstream WLAN protocols
- IP65 protection class
- High operating temperature range

Model	WIFI-Stick
Technical data	
Supported device	AISWEI inverters
Number of devices supported	5 units
Indicators	LED x 2
Configuration method	APP
Communication interface	
RS485	1 input
WLAN	2.4GHz 802.11 b/g/n
Power supply	
Input voltage	7 ♦ 9 Vdc
Average power consumption	2 W
Operation environment	
Operation temperature range	-30°C ♦ +70°C
Max permissible relative humidity (non-condensing)	100%
Max operation altitude	3000m
Protection class	IP 65
Basic data	
Dimension (W/H/D)	111 / 51 / 25mm
Mounting method	Plug and play
Certificate	CE
